

## Product Range Data Sheet

### Description

Bradleys Vantage Range of High-Grade Architectural Powders are a superior durable range of hybrid polymer finishes designed to protect the substrate and to retain a decorative, durable, long-life finish.

The Vantage Range of powders is well suited to steel based, zinc sprayed, stainless steel, galvanized and aluminium substrates. Designed for areas where attention to aesthetics and quality is important and works well in areas of high public use.

Available in a unique selection of superior quality shades including metallics, low sheen and MIO effects to compliment architectural design.

#### Collections
